Graduate Opportunity
Transport Engineering

Who ^{are} we

Momentum is an integrated, London-based transport consultancy. We are working on some of the most exciting and challenging planning and infrastructure projects, as well as large sport stadia and major events projects in London, Europe and across the world.

From inception to construction our Engineering team support the advancement of a variety of developments using the latest 3D design tools, on a range of public and private highway regeneration and urban realm infrastructure projects.

Our clients include major developers, architects and contractors; they include Landsec, The London Legacy Development Corporation, British Land, Delancey, Grosvenor, Segro, Brockton Capital, Brookfield, Mace, Multiplex and Mount Anvil. As well as our London-based development planning work, we have undertaken, we have recently expanded into Montreal and have undertaken projects in San Francisco, Moscow, Baku, Barcelona, Hong Kong, Ashgabat, Kazakhstan and Saudi Arabia.

As a young and growing company our future is being built around a team of the very best people. Offering recent graduates opportunities is a great way for us to achieve that, giving you a valuable introduction to our industry and our unique company culture, for which we provide a comprehensive reward package.

Our Opportunity

We are looking for a talented graduate to join our Engineering team on a full-time and permanent basis. We strongly believe in giving our junior members of the team training, responsibility and opportunities they need to develop, and our bespoke business of 33 staff means that all of our team are exposed to a wide variety of interesting project work and clients.

The successful candidate would undertake highway design work using AutoCAD software and have exposure to a range of projects, working on tasks including delivery and servicing designs, threshold checks, tracking and Section 278 works. For more of an insight into what our engineers do, please visit our services website page here:

<https://momentum-transport.com/services/>

The successful candidate will be given a competitive reward package, including a competitive rate of pay, access to Women in Transport and Women in Engineering membership if applicable, targeted and specialised training opportunities, as well as access to our internal mentoring scheme, in-house massages and weekly yoga sessions.

Next steps

If you are excited about this opportunity, please email a CV and covering letter explaining why you would be a great candidate for Momentum Transport Consultancy by **Friday 26th April 2019**, with the email subject being "Application to Graduate Engineering opportunity."

Email. info@momentum-transport.com

Applicants of interest to the company will then be asked to complete a short engineering assessment task, to be undertaken over an agreed 24-hour period. Following successful completion of the assessment, candidates will then be invited to interview. Interviews are due to take place in May 2019, in London.

Momentum Transport Consultancy is an equal opportunities employer.

In applying to Momentum you will be supplying us with personal data contained within your CV and cover letter. This could include your name, address, email, previous work details etc. In line with our Privacy policy (which we hold on our company website), we ensure that your data is held securely. We retain any applicant's details for 1 year following the end of the recruitment campaign.

Who we are looking for:

You will be a self-starter, love working in a small hard-working team and have a passion for the Urban Built environment, transport and highway infrastructure engineering and its challenges. You will provide support to a full range of Transport Infrastructure and Public realm projects.

Specific skills and experience:

Strong written and verbal communication skills

Strong numeracy skills

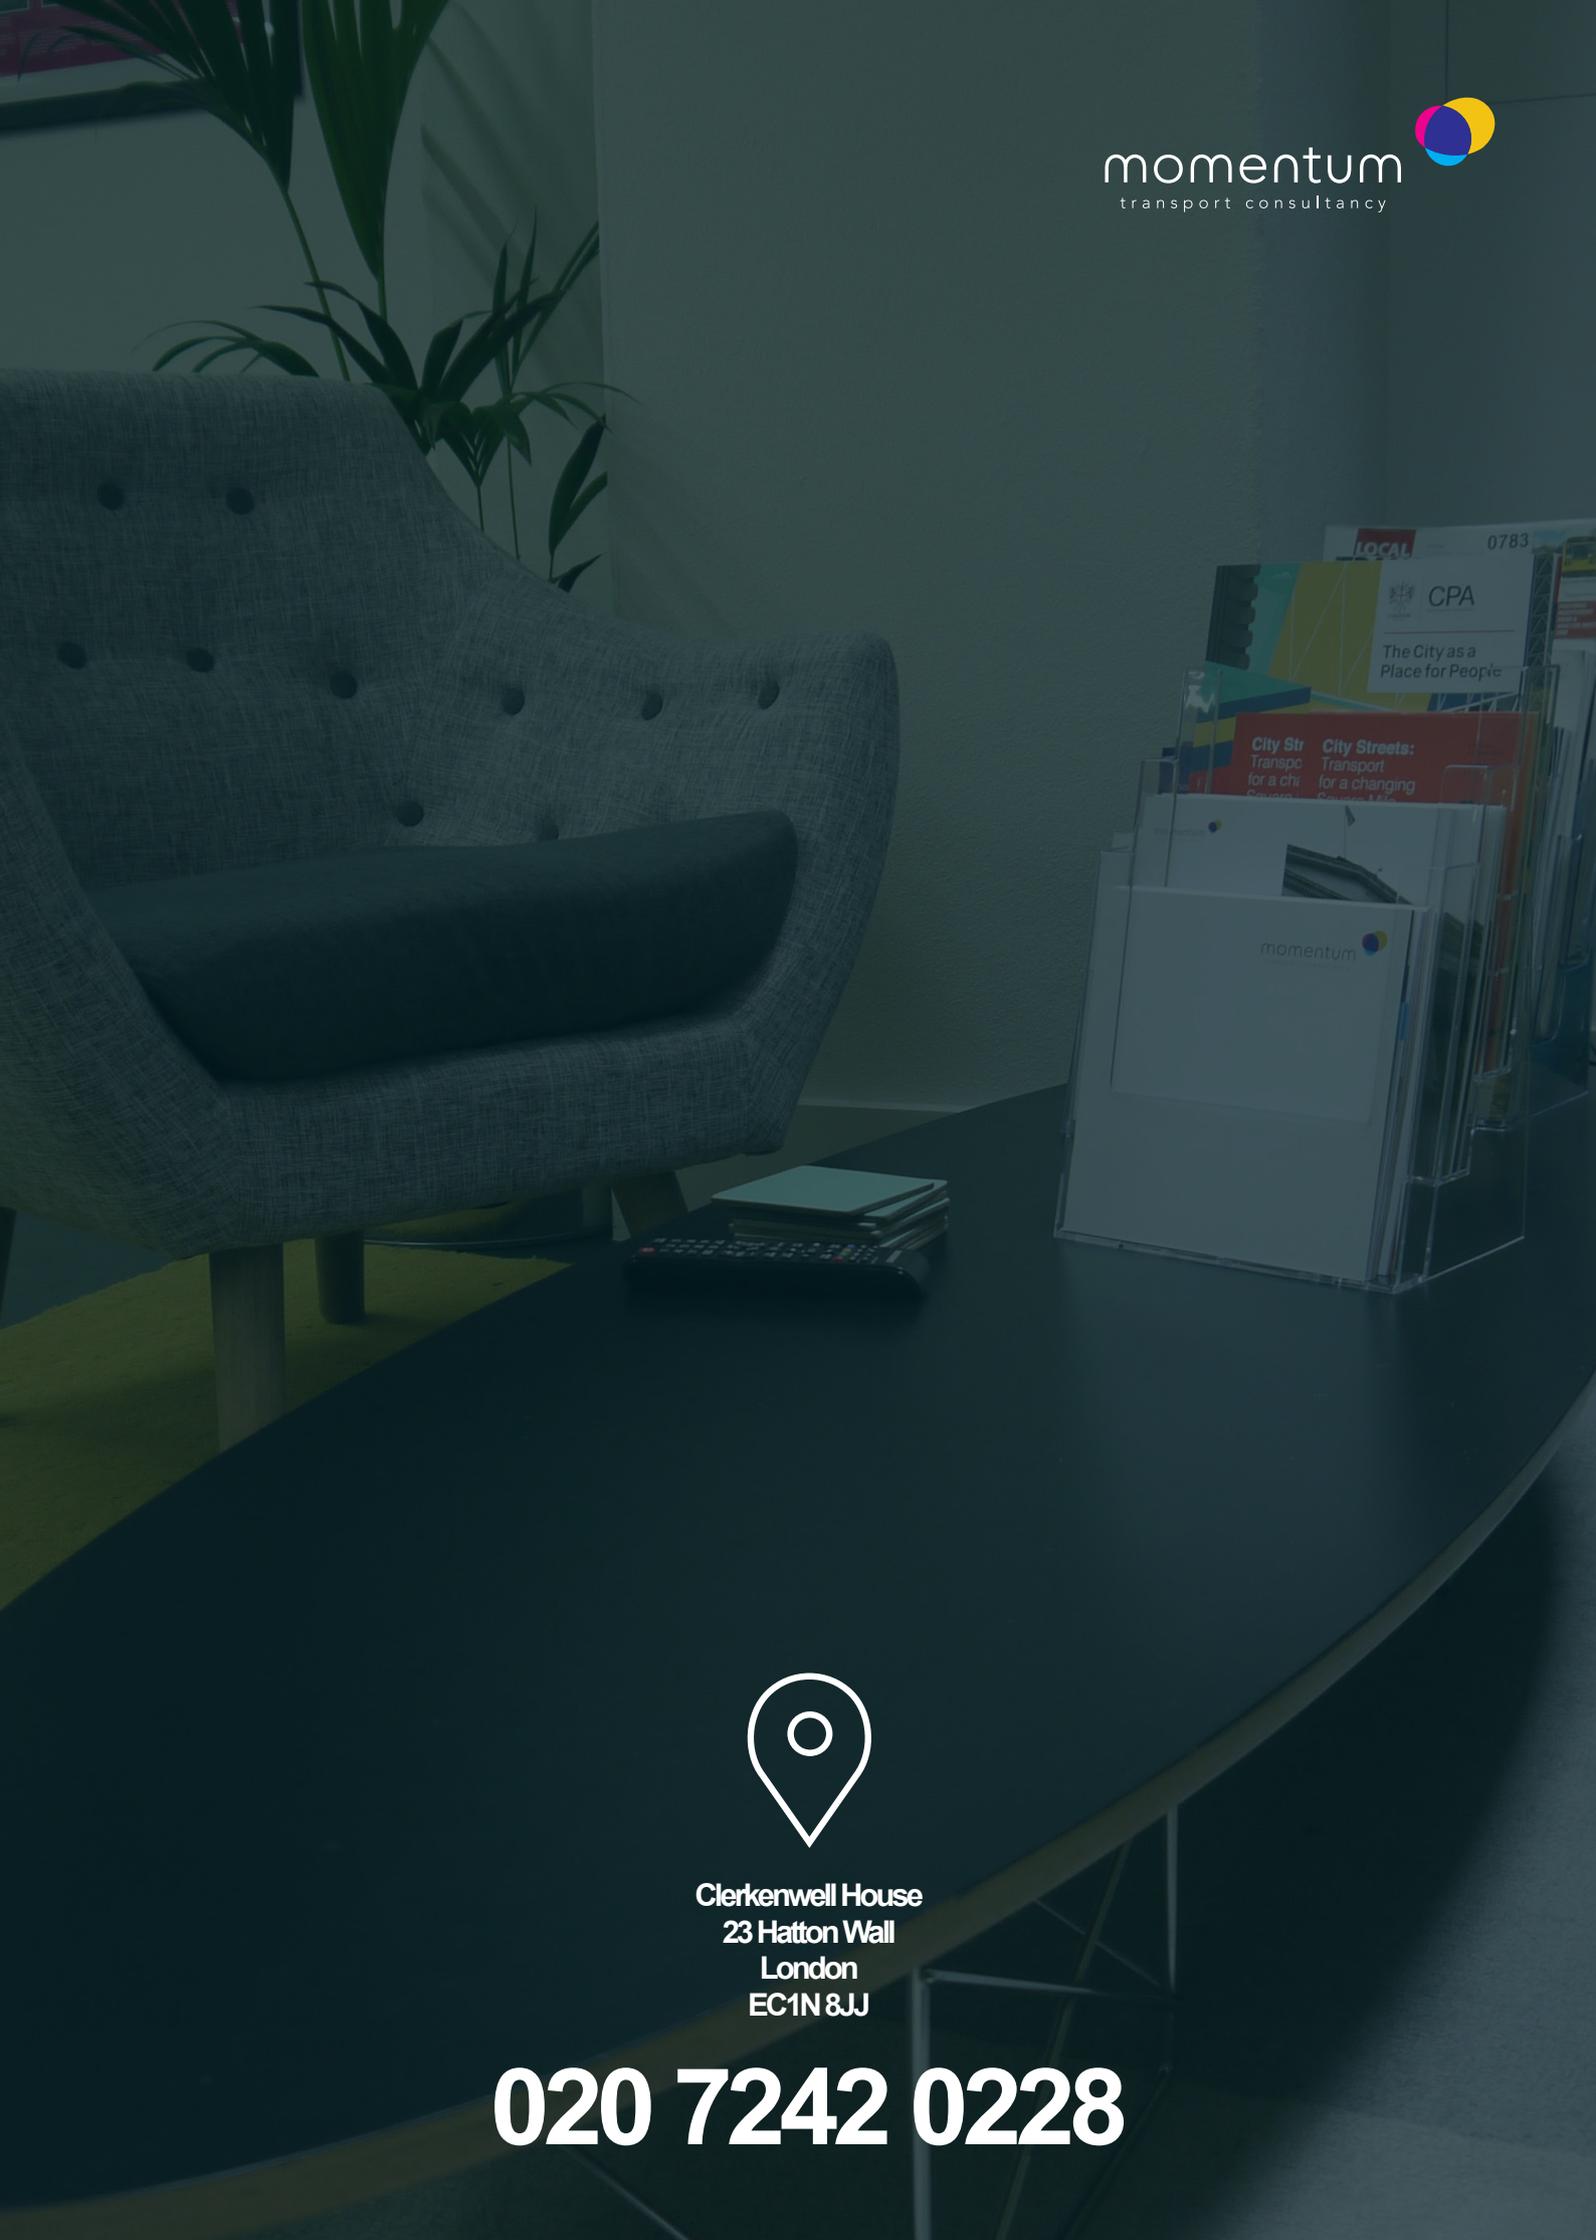

Strong analytical and critical design analysis skills

Experience of using Microsoft Office, in particular Excel and Word

A recently completed Civil Engineering degree, or similar technical engineering discipline

Desirable skills and experience:

Experience of using engineering software such as AutoCAD
